After responding, I also let him know that we got very mixed messages from SD when Shaun met with his DENR counterpart on DB last week to discuss the Class I vs. V ISR disposal permitting question. This

Ex. 5 Deliberative Process (DP)

further and will let you know either way. Ron can probably give you more details on this if needed (although I may have just confused him!).

I realize the sensitivity and precedent (though I think in the past HQ did accompany the region before resources got right), but this would be primarily a developmental opportunity (likely for Kyle Carey) so we can better understand the process, dynamics, and the substance of the review and perspective of the state and region on these reviews generally. If we need to discuss, I am back in the office on Monday.
